

# AFC系列电脑横机

## AFC SERIES COMPUTERIZED FLAT KNITTING MACHINE

AFC252/AFC352/AFC380 高效5.2英寸小机头  
Efficient 5.2-inch small carriage

本机型技术亮点：1, 弧形天杠导轨；2, 智能自跑纱嘴，可控纱嘴上下动作  
The technical highlights of this model :

1. Equipped with 4 pcs arc-shaped feeder rail
2. Equipped with Fully auto controlled feeder system

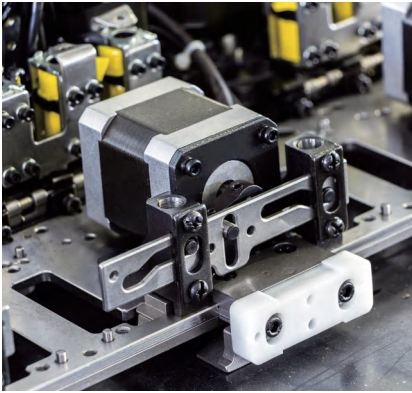

# AFC352/AFC380

4根自跑式纱嘴弧形导轨，16个自跑式纱嘴，电脑控制纱嘴上下运动位置。可精准实现嵌花、正反盖毛，减少纱嘴回踢，提高编织效率，是电脑横机的最新专利创新技术。

Equipped with 4 pcs arc-shaped feeder rail, 16 pcs auto motor-driven feeders, the movement of which are controlled by computer up or down. This could precisely realize the knitting of intarsia, inverse plying, and reduce running course, to improve knitting efficiency. It is the latest innovation proprietary technology.

电机推针结构，缩短编织行程，回转稳  
 The cam system utilizes motor-controlled needle raising structure, carriage effective movement distance is shortened, carriage return become faster and more stable.

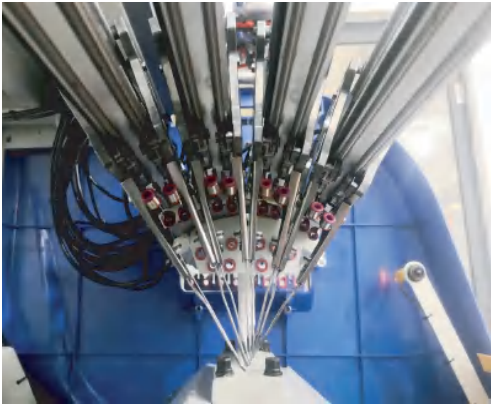

正反盖毛组织颜色鲜明，织片平整。  
 The front and back capping structure are more colorful and smoother.

上下运动沙嘴，可做嵌花，正反盖毛。  
 Up-and-down motion of feeder is more useful and effective for making intarsia and capping structure.

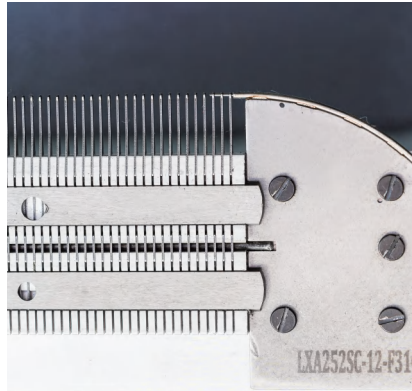

4根弧形导轨16把自跑沙嘴，减少回踢，提高编织效率，可做到最多16个颜色嵌花。

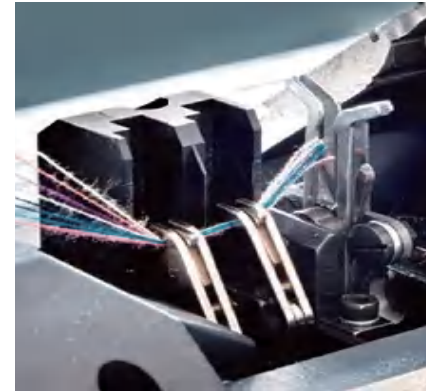

4 pcs arc-shaped feeder rail, 16 pcs auto motor-driven feeders, are utilized to reduce free carriage movement.

Knitting efficiency are improved, 16 colors intarsia structure can be made maximumly.

可选配零间纱起底板，无需废纱起底，大大提高生产效率，节约人工成本。

Non-waste yarn starting comb is selectable for saving yarn and labor cost.

可靠的剪刀夹子装置，通过系统控制，实现自动夹纱剪纱操作。

Stable scissor and gripper are controlled by program, auto grip and cut motion are realized.
